MDI Screens

Écrans MDI

MDI Screens | Écrans MDI

Largest coating tower in the world for 3D screens.

a  **STRONG** Company

MDI Screens | Écrans MDI

- New **MDI** coatings are chemically engineered for the *environment* as well as for *performance*.
- **MDI** uses Water-Based Coatings :
 - Less than 6% chemical solvents are used,
 - *Other coatings, even if “water-based”, may have a chemical solvent concentration of 40% or more.*
- Applied on the highest quality PVC substrate available with a fully automated coating system.
- Wide range of silver and gain products to meet all exhibitor requirements.

MDI Screens | Écrans MDI

- New **MDI** Aluminum Coatings for 3D Silver Screens :
 - 2.1 and 2.5 Optical Gain on axis – *Deep Metallic*
 - *Silver surface is required for major 3D formats and is also used for 2D.*
- New **MDI** Gain White Coatings :
 - 1.5, 1.8 and 2.2 Optical Gain on axis – *Pearlescent Bright White*
 - *These new gain surfaces can reduce operating costs of digital xenon lamps in both 2D and 3D applications.*

MDI Screens | Écrans MDI

The **Green Screen** Company

In addition to more environmentally friendly coating formulations and techniques...

MDI Screens is introducing the

Green ECO Screen Recovery program

We will recover and recycle used screens being replaced by new **MDI Screens** *at virtually NO COST to the Exhibitor.*
